Instant Whey Protein Isolate 90%

Just added to inventory – samples and stock available now!

Product Description

Whey protein isolate is manufactured from sweet dairy whey using cold microfiltration and ultrafiltration membrane technology. The product is then gently spray dried and lecithinated into a granular, free-flowing powder that is readily dispersible in water. The process results in an undenatured whey protein that is highly soluble over a wide pH range and has a very clean, bland flavor.

Applications

- **Sports Nutrition** – commonly used by bodybuilders as a protein supplement to accelerate muscle development and aid in recovery. Can be found in products like: nutritional bars, powdered mixes, meal replacements, and other supplements
- **Dietetic Products** – to increase antioxidant levels in individuals with abnormal immune systems or degenerative diseases. Also, with diabetics (according to some studies) to prevent blood sugar spikes after high carbohydrate meals
- **Beverages** – functional drinks and fortified waters
- **Bakery** – breakfast cereals, dry mixes
- **Snack Foods**
- **Dairy / Cheese**
- **Contract Manufacturing** – tablets, pre-mixes

Major Form

Instantized. Isolates are processed to remove the fat and lactose. They are 90%+ protein on a dry basis and are mild to slightly milky in taste.

Manufacturer Information

- Manufactured from white cheese only to obtain white color
- Product of the USA – Mullins Whey, Mosinee, WI

Certifications / Labeling

Allergen Statement, COA, MSDS, Kosher, and Quality Certification & Analysis are available upon request.

Packaging and Storage

- Heat sealed, multi-wall kraft paper bags with low density laminated polyethylene liner
- Net weight: 20 kg (44 lbs)
- Store in an odor free environment below 80° F with a relative humidity below 65%
- Use stock in rotation within twelve months
